

Basic of Computer Networking

Week 4 Tasks

Task 1: Use nslookup or dig to do a dns lookup on www.growthschool.io and see what is the response coming as.

Cloud Data Engineering CAP by Riya Bansal & Sanket Singh

Task 2: Figure out how can you use nslookup to find name and IP address of SMTP server of gmail.com

Task 3: Suppose you have a web server running on your network that is listening on port 80. Write a TCPdump command that captures all HTTP traffic coming to the server and saves it to a file called "http_traffic.pcap"
